ECAR CHALLENGES THE WORLD

A significant effort has been made to sort through the **maze of wood gasifier claims** presented over the years. To date, however, in the field of wood power alone for conventional vehicles, **no serious program has been found.**

Science, we must come to realize—like politics—is often overly stuffed with bologna. In the gasification field, this is a light hearted subject for most, **but a very serious detriment to scientific efforts** toward, for example, **wood as an emergency fuel** in a catastrophic fossil fuel situation.

Some order must be established in this field before government, industry or the public will accept a serious effort toward a **national contingency plan for wood as an alternate fuel** for transportation. **ECON** even after a thorough search for a field leader **will not directly assume this position.**

In order to further clarify the overall picture and to **settle the dust from the wild gasifier claims**, ECON announces plans to create a...

\$10,000 CHALLENGE
TO ANY ESTABLISHED ENTITY ABLE TO
BETTER THE CAPABILITIES OF ECAR. (See challenge rules.)
